Bernard Stahn**

As at May 2009

Association Archives Have Been Updated To May 2009

Valerie and I have just gone through the last 16 months of SONATA NOTES and sorted the published articles into the various categories.

The format of the listings needs an overhaul. There area also a few glitches that were introduced during translation from an outdated word processor format. Once repackaged, the listings will be suitable for inclusion on our website.

For the benefit of newer members, newsletters are listed in the archives by months and year under various subject headings, thus permitting the retrieval of articles which have covered a particular subject in the past.

Most popular have been chapters on Maintenance, Repairs, Improvements and Cruising.

Thanks to the generous efforts of fellow member Ben Pitcher the hard copy archives of all early newsletters from 1979 have been scanned and added to the on-line archive and members can now access these via the website.

3. MAINTENANCE AND REPAIRS (As at May 2009)

Note: N/L refers to newsletter or Sonata Notes followed by issue date, month and year
USE AT YOUR OWN RISK!

The material referred to in this section has either been applied successfully by some members or has merely been considered for application. It is not necessarily comprehensive. As a potential user of the information you must ensure that the work is carried out with the appropriate skills, tools and materials. If you are unsure of these conditions being met, have a chat with other members, and rather have the work done by qualified people. Never forget that certain failures can endanger life and incur substantial loss of property. The fine print of most insurance policies has something to say about this. Consequently the SYAV Inc. does not accept responsibility for any losses resulting from the use of the listed information.
